Property Description

Located only 10 minutes off the paved road in Platanillo this property is perfectly located for a commercial or residential project. The public road literally ends on the property which makes it very private. From 6 buildable spots you will be able to have views to the ocean, the Baru river, the Escaleras ridge, Lagunas and even to the back to the Cerro de la Muerte. All the 6 spots are separated from each other and can be connected with internal roads. There is definitely more area to explore. The property touches the Baru river but it is almost inaccessible because of the steep drop off. There are two creeks and one spring on the property. Electricity and fiber optics internet are right on the public road. The last part of the public road is not in a good shape, but the seller will pay to improve that section. The elevation of almost 1000 ft over sea level provides great breeze during day- and nighttime.
